

# New Course!

## NAVIGATING FAITH AND GENETICS

A Five-Week Online Course from the  
Faith & Life Sciences Reference Group

- June 5 - July 3, 2024
- Wednesdays, 4-5:30 PM ET
- Hosted on the CHURCHx platform

As the world of biotechnology continues to develop, people of faith can wonder what if anything Christianity has to say about emerging technologies. Participants in this course will study new discoveries and developments, reflect on their implications, and share their reflections with their peers as they learn to articulate their own perspectives on biotechnologies. Facilitated by Council staff Dr. Michael Buttrey with guests from the Faith and Life Sciences Reference Group. Register for the course [on CHURCHx](#) or email [Michael Buttrey](#) for more information.
